

Improving family and  
community care through  
highly specialized nurses

## ENhANCE Final Conference | Family & Community Nurse – meeting the needs of end users

The ENhANCE project [www.enhance-fcn.eu](http://www.enhance-fcn.eu) aimed to design and deliver a European Curriculum for Family and Community Nurse (FCN). Community- and home-based care delivered by FCN can be considered an efficient investment in primary care and in improving public health and patient outcomes. FCN deliver safe, quality and person-centred care directly in the community, supporting the individual needs of families.

**Date and time of webinar Day 1: Thursday 6 May 2021, 09:30-11:40 hrs CET**

This webinar will present the role and profile of the Family Community Nurse, perspectives and experiences with FCN in different European regions and settings. The educational institutes who piloted the European FCN Curriculum will demonstrate how it could be adapted to their specific local contexts and needs. The ENhANCE FCN European Curriculum was piloted at the University of Genoa, (UNIGE); the University of Eastern Finland (UEF) and the University of Thessaly (UTH). The webinar welcomes the feedback and participation of a broad audience to further encourage new editions of FCN programmes based on the ENhANCE FCN Curriculum.

### Agenda – Day 1, 06/05/2021

#### Improving family and community care through highly specialized nurses

09:30-09:35	<b>Opening and welcome</b>	Nadia Kamel, Eurocarers
